

Stellar Fiber Laser Laser-SF30Ai

Introduction:

Stellar fiber laser printer illustrates high accuracy and concise precision that are used for permanently marking on wide range of products. Our fiber laser printer operates with a wavelength of 1604nm and lift a precise laser beam spot size with upmost sharpness and excellent quality. It is ideal for coding high density packaging material such as metals and plastics.

Application

Targets: Stellar Fiber Laser Printer can be used on wide range of targets like Medical devices, plastic, metals, food packages, glasses, cooking utensils, electrical appliance, stainless steel products, etc.

Industries

Stellar Fiber Laser Printer is widely used in industries like Pharmaceuticals, Automotive, Electronics, FMCG, Electrical Appliances, Glass, Stainless Steels, Packaging industries, Healthcare, Retails, Ceramics, etc.

Features:

- ◆ Ultrahigh accuracy and precision with stable power output
- ◆ Pollution free, noise free and no usage of consumable materials
- ◆ Enabled with air cooling system, that control environment temperature while working
- ◆ Used for various applications like printing dates, price, batch linear & data matrix barcodes, logos, graphics, etc
- ◆ Customized control system
- ◆ Super long service life up to 8-10 years
- ◆ Easy to operate and best stability while working
- ◆ Negligible maintenance required

Technical Specification:

Laser Wavelength	1064nm
Laser Power	20/30W
Laser Type	Optical fiber laser
Refrigerate Style	Air - cooled
Line-Width	0.01mm
Min Font Height	0.2mm
Markable Depth	0.05 - 0.2mm (Depending on object material)
Operation System	Computer software control
Printable Content	English, digit, graph, series number, barcodes etc.
Working Area	70X70mm, 110X110mm, 160X160mm (Optional)
Interface	Ethernet, USB, RS232, Multiple definition I/O
Marking Speed	0 - 50m/minute
Power Supply	Up to 1000W
